**Now See How We've Made
Buying From Us Even Easier!**

**The World's Best Vertical Work Positioners
Shipped in Three Weeks or Less!**

In 1979, Southworth revolutionized the way lift tables were configured and built. The development of our Matrix Line created the opportunity to offer the industry's fastest ever lead times. It also led to the creation of our SwiftLift™ Program which guaranteed shipment of over 400,000 lift configurations in three weeks or less.

Forty years later, we continue to offer the industry's best lead times, but now we're about to do even better. We've revisited SwiftLift and dared to imagine how the application of modern engineering, materials planning and manufacturing technology could make it even better.

The New and Improved SwiftLift Program creates three new product categories that include thousands and thousands of configurations that ship in 3 weeks, 2 weeks and even 1 week or less!

SwiftLift™ is fast! You determine how fast based on the configuration you choose.

1 > Stock Ships in 1 week

Over 50 configurations of Lift Table, Container Tilter, Pallet Level Loader, and Portable Lift Models.

2 > Modified Ships in 2 weeks

Add many of our most popular options plus specify any lift table platform size up to 72" x 96".

3 >> Modified+ Ships in 3 weeks

Add virtually unlimited configurations including any standard option and even light customization.

LS Series Hydraulic Lift Tables SwiftLift Availability

1 Stock Ships in 1 week
